Education

B.S. Computer Science and Economics, Minor in Mathematics — Tacoma, WA
Pacific Lutheran University — *Sept. 2024 – May 2027*

- Relevant coursework: Data Structures, Databases, Operating Systems, Web Programming, Machine Learning, Computer Organization, Linear Algebra

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, SQL, HTML/CSS
Frameworks & Data: React, Node.js, Express, Streamlit, MongoDB, SQLite
Tools: Git, GitHub/GitLab, Jupyter Notebook, Figma, Agile Development

Experience

Microsoft — Redmond, WA
Software Engineer Intern – Substrate (MRS) — *May 2026 - August 2026*

- Built an LLM-powered on-call assistant for engineers handling IcM alerts, reducing incident triage time by an estimated 30–40%.
- Designed agent workflows to parse incident metadata, summarize root causes, and recommend next-step actions using internal telemetry.
- Integrated the assistant with Microsoft Response Services pipelines, improving access to historical incidents and remediation patterns.

Admission Office - PLU — Tacoma, WA
Admission CRM Student Intern — *August 2026 - May 2027*

- Managed and quality-checked Slate email campaigns reaching 2,000+ prospective students, validating recipient queries, personalization fields, links, and send schedules before deployment.
- Triaged and resolved CRM support issues for Admission Operations, investigating portal errors, failed communications, system malfunctions, and applicant-data inconsistencies.
- Built and updated SQL/T-SQL queries to identify missing or conflicting applicant records, verify application statuses, and support reporting and communication workflows.
- Maintained applicant-facing HTML and Liquid templates, troubleshooting dynamic content and data-rendering issues across portals and admission communications.

Tacoma Parts Corporation — Seattle, WA
E-commerce Operations Specialist — *Dec. 2025 – Mar. 2026*

- Built a central SKU database mapping internal inventory to Amazon, Walmart, and eBay identifiers, reducing synchronization errors and manual reconciliation.
- Managed daily e-commerce operations for a $10M business and resolved time-sensitive account, shipping, inventory, and marketplace issues.
- Improved claims and reverse-logistics workflows for lost shipments, inventory discrepancies, and customer-order exceptions.

Salesforce CWK Camps, Bellevue College & Redmond Community Center — Seattle, WA
Coding Instructor — *Apr. 2025 – Jul. 2025*

- Taught Python and programming fundamentals to 200+ students through AI, game-development, and Minecraft Modding projects.

Projects

New Technologists Fellow – Cyborg Mobile — Apr. 2026 – May 2026

- Built a full-stack digital health MVP using Python, Streamlit, and SQLite within an Agile development process.
- Developed data pipelines and analytics dashboards supporting user tracking and machine-learning workflows.

Stock Price Predictor via Sentiment Analysis — Jun. 2025 – Present

- Built an LSTM-based model to forecast stock-price movement using 10 years of historical market data.
- Processed 650K+ news articles and generated sentiment features using VADER, FinBERT, and DistilBERT for model experimentation.

Leadership

Pacific Lutheran University Tacoma, WA

President, GirlsWhoCode Loop & VP, Project Management Club *Sept. 2024 – Present*

- Founded PLU's GirlsWhoCode chapter and mentor incoming CodePath students through technical learning and interview preparation.
- Helped lead a $330,000 student investment portfolio; team placed Top 3 in Washington in the CFA Research Challenge.
